NIGHT

DAY

Rainbow bright

Turquoise sky, kelly-green grass, orange sunsets and beautiful flowers make people want to wear color in the summer," explain Liz Lange and Jane Wagman, co-founders of shopafrolic.com, who add that nothing complements brights better than metallics. "Whether gold, bronze or silver, take your look up a glamorous notch with gilded heels or layered jewelry." Create a sharp day look by pairing your shorts with wedges instead of flip-flops — the leg-lengthening look is über-sophisticated and can easily take you from summer days to nights. While you shouldn't be shy about wearing color to the office, steer clear of blinding neons, which are best kept for evenings on the town.
